

**YOU'RE THE BEST AT
WHAT YOU DO . . .**

Specialty Certifications are an excellent way to show the world that you are the best at what you do. Have you ever thought about obtaining your specialty certification but didn't know how to prepare? Do you need a little extra boost to get you ready? Well, here's your chance!

This two day session is designed as a comprehensive review session for the CFRN, CTRN, and FP-C exams. It provides an extensive review of all facets of transport and emergency care for those who want to review or expand their practice. The major feature of this class is a systematic review of all systems following the blueprint for the CFRN, CTRN, and FP-C.

Instructional methods include didactic lectures, x-ray interpretation, case scenario examples, and Q&A discussion. The overall objective of this course is to prepare transport nurses for the certified flight registered nurse exam and flight paramedics for the flight paramedic certified exam. Paramedics and Nurses have reported a high success rate on both certification exams after taking this two day review course, and we know that you will do the same with the right preparation. Sign up now, and join us on April 26th and 27th as you prepare to certify!

... NOW LET'S PROVE IT!

CFRN/CTRN/FP-C REVIEW COURSE

APRIL 26- 27, 2008

**Lutheran Hospital
Fort Wayne, IN**

CFRN/CTRN/FP-C REVIEW COURSE

Course Faculty

Jill Johnson, RN, MSN, FNP, CCRN, CEN, CFRN

Course Objectives

- Participants will be able to identify the clinical presentation and specific transport management of commonly seen critical care conditions in the transport environment.
- Participant will be able to identify key assessment findings for specific emergencies and treatment of the pediatric and adult patient in the following areas: cardiopulmonary emergencies, traumatic emergencies, obstetrical and neonatal emergencies, neurological emergencies, and multisystem emergencies.
- Participants will be able to identify safety and altitude considerations and management priorities as well as the effects on patient care, if any.
- Participants will be able to identify their areas of strength and which areas they need to study.
